DETAILED ACTION

1. Claims 1-20 are presented for examination.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed "first memory", "alternate memory", "history file" throughout the claims (especially in claim 19) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
4. This application is in condition for allowance except for the above formal matter.
 - a. Claims 1-20 are allowed over the prior art of record because none of the prior art of record teaches or fairly suggests the claimed operations of reallocating selected information residing in or to be stored in a first memory in an alternate memory and then restoring the reallocated information based on the established history file that records the data processing criterion (claim 1) or historical message processing rate (claim 18) or

Art Unit: 2187

historical processing information about a computing environment or about at least one application running in the computing environment (claim 19).

b. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

5. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Chen et al., 2003/0041115, teaches the operation of managing memory resident queues to control resource of the system using the queues.
